

EdLab Group

The mission of the EdLab Group is to leverage the power of technology and diversity to transform teaching and learning.

EdLab Group programs make meaningful and widespread impact by focusing on key leverage points in the education system - professional development for teachers, engaging curriculum, and evaluation services that provide information for ongoing program improvement.

We provide...

www.edlabgroup.org

- **After School and Summer Programs** that engage students from predominantly minority and low-income areas in hands-on technology and science projects, fun creative challenges, and experiential field trip and role model visits. Program Leaders generate excitement about careers in science, technology, engineering, and math (STEM) as they cultivate student confidence and motivate students to prepare themselves for a world that needs, demands and rewards technology ability.
- **Collaboration** between organizations dedicated to expanding opportunities in science, technology, engineering, and digital inclusion. We enable professionals across projects and communities to generate creative solutions and strategies that maximize benefit beyond that which one project or community could accomplish.
- **Curriculum Development** for teachers looking to integrate technology into their educational activities. We specialize in products, seminars, and professional learning resources that provide innovative strategies for teaching and learning in the 21st century.
- **Evaluation** of programs supporting science, technology, and engineering equity, informal and formal education and teacher professional development. Through our partnership with Evaluation & Research Associates, we collaborate with clients to measure results, report outcomes, inform decision-making, and increase program success.
